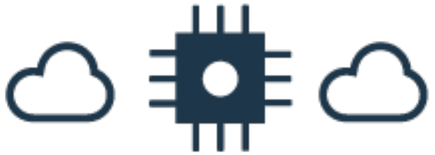
Your device or gateway

We start with your device, be it a sensor, a gateway or something else.
To find out how to get it connected, search our recipes.

MQTT

Your device data is sent securely up to the cloud using
the open, lightweight MQTT messaging protocol.



IBM Internet of Things Foundation

This is the hub of all things IBM IoT. This is where you can
setup and manage your connected devices so that your
apps can access their live and historical data.

REST & Real-time APIs

Use our secure APIs to connect your apps
with the data coming from your devices.

Your application and analytics

Create applications within IBM Bluemix, another cloud,
or your own servers to interpret the data you now have access to!

Devices Can…

1. Publish Events
2. Subscribe To Commands

Connecting Devices

1. Organization ID
2. Device ID
3. Device Type
4. Auth Token

Applications Can…

1. Subscribe To Events
2. Publish Commands
